Summary

Cybersecurity undergraduate focused on networking, Linux, security operations, and practical security analysis. Building hands-on experience through cybersecurity labs, security projects, and hackathons, with a strong focus on developing networking and system security fundamentals. Seeking opportunities to apply and strengthen cybersecurity skills in a real-world environment.

Education

BTech in CyberSecurity

Sasi Institute of Technology and Engineering

- 2029 • CSE

Projects

ForensicDesk

Project Link

ForensicDesk — Digital Forensics Investigation Platform | Completed Project

- Built a browser-based digital forensics platform designed to organize digital evidence and support structured investigation workflows.
- Developed an investigation workflow featuring evidence organization, artifact exploration, timeline analysis, and an investigation board.
- Focused on presenting forensic findings through a structured interface to support systematic analysis and reporting.

Achievements

- Team Lead — Smart India Hackathon (SIH): Led a team working on **SignalFusion – SOC Alert Fusion**, a solution focused on reducing SOC alert overload through intelligent alert correlation and prioritization.

Hands-on Cybersecurity Labs — TryHackMe

- Completed hands-on security labs covering network reconnaissance, Linux fundamentals, AI security, and SOC investigations.
- Practiced SOC alert triage, IP reputation analysis, malware hash investigation, YARA rule analysis, and MITRE ATT&CK mapping through guided security scenarios.
- Achieved a 100% true-positive rate in a TryHackMe SOC simulation scenario.

Capture the Flag (CTF) & Linux Practice

- Practiced hands-on cybersecurity challenges to strengthen problem-solving, command-line proficiency, and technical investigation skills.
- Progressed through OverTheWire Bandit challenges, applying Linux commands, file operations, and fundamental security concepts.

TryHackMe League Achievement

- Secured **3rd place in the TryHackMe Silver League**, demonstrating consistent participation in practical cybersecurity learning activities.

Skills

- Cybersecurity Fundamentals
- Networking Fundamentals
- Network Reconnaissance
- Problem Solving
- Social Engineering
- Nmap
